

Region 3 GPRA Baseline RCRA Corrective Action Facility

Univar USA, Inc. (Formerly: Van Waters & Rogers Inc.)

6000 Casteel Drive
Coraopolis, PA 15108
Congressional District 20
EPA ID #: PAD061779815
Last Updated: 6/30/2005

Current Progress at the Site

This facility is one of EPA Region III's high priority RCRA corrective action sites and EPA has determined that both the Human Exposure and Groundwater Environmental Indicators have been met.

On June 21, 1999, EPA determined that both the Human Exposures and Groundwater Environmental Indicators have been met. EPA is currently evaluating the information to determine if all of the corrective action requirements have been met. Univar continues to operate a groundwater pump and treat and soil vapor extraction systems to remediate a VOC contamination problem associated with a former product solvent above ground tank farm. The tank farm and Univar's operations have been shut down for several years. These systems have been approved by the state. Univar recently (2004) expanded the SVE system and installed additional groundwater extraction wells to hasten remediation. The major contaminants are dichloroethene, dichloroethene trichloromethane TCE and TCA. Groundwater and soil contamination continues to be contained within the 3 acre sight.

Site Responsibility

RCRA Corrective Action activities at this facility are being conducted under the direction of EPA Region III with assistance from the State.

Institutional Controls

There are no institutional controls at this time.

Government Contact
